DECEMBER 2010

## DUMP TRACKER NEWS

### Tis the Season...

Its December and the weather never disappoints in Minnesota. We think the December issue of Dump Tracker News won't disappoint you either!

Read about our featured product, maintenance tips and test your cold weather knowledge in this issue.

Please forward your comments, interests, and suggestions to:

[dpuckett@tbei.com](mailto:dpuckett@tbei.com)

We look forward to hearing from you!

### Snow and Ice Trivia

Which of the following is not affected by wind chill?

- a) A person
- b) A dog
- c) A car radiator
- d) A bird

To find the answer please visit [www.j-craftinc.com](http://www.j-craftinc.com) and click on the "Newsletter" button.

For more information on the J-Craft SideWinder call the Inside Sales Team at 1-800-864-3828.

### J-Craft Offers All-Season SideWinder

As an innovator of snow and ice solutions in Minnesota, J-Craft understands the need for equipment that's tough enough to withstand year round use in Minnesota's extreme weather conditions.

J-Craft manufactures the ideal product for winter ice and snow control---the SideWinder. Used in winter conditions throughout the U.S., this vehicle can be converted to spreading mode without adding any additional equipment. A removable conveyor offers convenience for simple summer maintenance or the conveyor can stay intact and covered with a drop-down panel for minimizing storage of spreader equipment.

The spinner is located in front of the rear wheels allowing the

## Grab a Spare for Maintenance and Repairs!

You can buy all your replacement parts for your dump truck at J-Craft.

Call or email Aaron Breitzkreutz, Inside Sales at [abreitzkreutz@tbei.com](mailto:abreitzkreutz@tbei.com) or 1-800-763-6017.

## Maintenance Tip

Check the hydraulic filter gauge during each maintenance cycle and charge the filter element yearly.

Power wash material off vehicles after each use to prevent rust.

## Contact Us

52182 Ember Road

SideWinder to operate on incline routes more efficiently. The SideWinder uses cylinders on the passenger side that lift 2/3 off the floor and side, moving material to the conveyor. Material flows into the spinner spreading sand and salt up to 25 feet allowing better traction by spreading material in front of the drive wheels with continuous feed from the body.

## Construction

- Corrosion resistant COR-TEN steel
- 100% continuous welds
- Spinner guard keeps material away from driveline
- Constructed with heavy-duty I-Beam understructure
- AR400 Floor

## Options

- Stainless Steel construction
- Spinner baffle kit
- Tailgate chutes for material flow control
