FOR THE LONG HAUL**

Innovative Dump Body

More than just a well designed and manufactured make the difference in a premium equipment part J-Craft has the team to make your truck work for y

BODY STYLE OPTIONS

TRADITIONAL (SQUARE) STYLE

- 8" radius corners formed between floor and sidewalls to reduce hang up of material
- Lower load center of gravity

ELLIPTICAL STYLE

- Smooth, streamline style
- 18" radius opening offers easy clean-out
- Elliptical design resists denting with less flat surface for material to hit

FRONT OPTIONS

- Sloped front
- Straight front
- Bailmount

Sloped front design removes 2/3 of doghouse, allowing for easier cleanout and less weight, while providing a convenient area for reservoir or toolbox.

Bailmount front completely eliminates the doghouse for excellent clean-out and increases capacity.

SIDE OPTIONS

TRADITIONAL (SQUARE)

- Sloping sides
- Tarprail (upper and lower)
- Single Panel (with or without fender)
- Double Panel
- Vertical and/or horizontal side braces
- Ladder (rigid or folding)

Sloping sides eliminate the need for sideboards and offer better weight distribution by allowing more payload at the front of the body.

ELLIPTICAL

- Sloping sides
- Tarprail (upper and lower)
- Fenders (aluminum or steel)
- Ladder (rigid or folding)

Full length aluminum fenders are a great side option to save weight while providing a stylish look.

Solutions Since 1978

dump body, J-Craft's equipment choices and installation options
er. The options available exceed the limits of these pages.
ou.

TAILGATE OPTIONS

- Asphalt rear
- Sloped rear
- Straight rear
- Power tailgate (hydraulic or air)
- Tailgate release (manual or air)
- Patchgate (sliding)
- Multiple rear light configurations
- Tailgate hardware
(7" or 12" offset or double link)
- Tailgate bracing (horizontal,
vertical, full rib)

Traditional (full rib) double wall
tailgate features easy operation.

Asphalt tailgate eliminates the need for a spreader
apron and allows you to pull away from the paving
unit while the body is raised.

Straight rear with barn door tailgate.

Power tailgate creates an opening 18" higher than
tailgate itself.

UNDERSTRUCTURE OPTIONS

- Crossmemberless I-Beam
understructure
- Crossmemberless I-Beam
understructure offers
easy cleanup and
maintenance with less
material hang up.

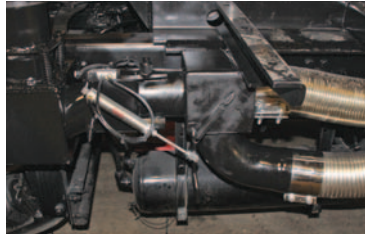

Standard I-Beam understructure.

Heated I-Beam understructure.

ADDITIONAL OPTIONS

- Cabshields
- Pull or Electric Asphalt Tarp
- Solid Poly Side Boards
- Spillshields
- Poly Fenders
- Heat Kits (11)
- Vibrator (installed)
- Ladder (rigid or folding)
- Steps inside body
- Sloped front toolbox
- Patchgates Sliding

Heat kit.

Sloped front toolbox.

Electric cable tarps.

High 'N Slide™ Multi-Function Tailgate

Patented Design offers Increased Opportunities

- Increase the hauling and delivering abilities of your dump body with the new High 'N Slide tailgate that offers traditional dump-through, sliding and high-lift functionality
- Change from high-lift to sliding with traditional dump through always available with ease utilizing simple mechanical adjustment

Sliding Tailgate offers Versatility

- Control the metering of salt, sand, pea gravel and other materials with a 17.5" maximum sliding height and full-width opening
- Access mulch, sand, asphalt and other materials without raising the dump body when shovel loads are required
- Connect easily with sealing equipment without concern for your tailgate swinging into the equipment

High Lift Tailgate offers Convenience

- Empty rip-rap and other large and bulky items without hanging up or damaging your tailgate with an additional 21" of clearance
- Remove brush without laying tailgate down, eliminating potentially damaging and dangerous process
